check position of menu--it needs to be moved down to allow for the tagline on interior pages

"SEND US AN EMAIL" should be smaller and gray. Same with "SEARCH" There should be more space b/t email and phone and phone and search box.

BIG PRIZES RESULTS.

The menuing text will probably have to be a system font. It seems really slow on different machines we've tried it on and most likely we will be on a Windows host.

We also have problems with the display on IE (a screen grab is attached).

Remove the 2nd "MEDIA" item.

Change to Solex as on original. I have provided a .jpg. There should be enough SEO-related copy in the copy block to compensate.

reduce size of type by about two points (including "MORE"). The MORE should scroll and not link to another page. It shouldn't appear in a scrolling box but should populate the same space each

images provided for this section. Make sure it feels more like this and not so tight.
